Allowable Subject Matter

1. Claims 1, 2 and 5-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reasons for the allowance of the independent claims 1, 8, 10 and 15 are the inclusion of limitations that are not found in the prior arts and they are uniquely distinct features. The closest prior art is Meaden (4,642,793). Meaden discloses a data transformation circuit for transforming an input data value into an output value. Meaden further discloses a hashing circuit for combining the input value with a selectively variable hashing key and a result register having a plurality of sections.

However, this art fails to anticipate or render the following limitations:

"Claims 1, 8 and 10: hashing a hash vector based upon an encryption key by scanning indexed bytes of the encryption key and using indices and associated values of indices of the encryption key as indices of two bytes in a hash vector to be swapped."

"Claim 15: means for hashing the hash vector based upon an encryption key by scanning indexed bytes of the encryption key and using indices and associated values of indices of the encryption key as indices of two bytes in a hash vector to be swapped."

3. The dependent claims 2, 5-7, 9 and 11-14 are allowed because they were originally found to include a unique feature not found in the closest abovementioned art.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
